

**Fully automated
sample-to-result solution
with a broad spectrum of
PCR tests**

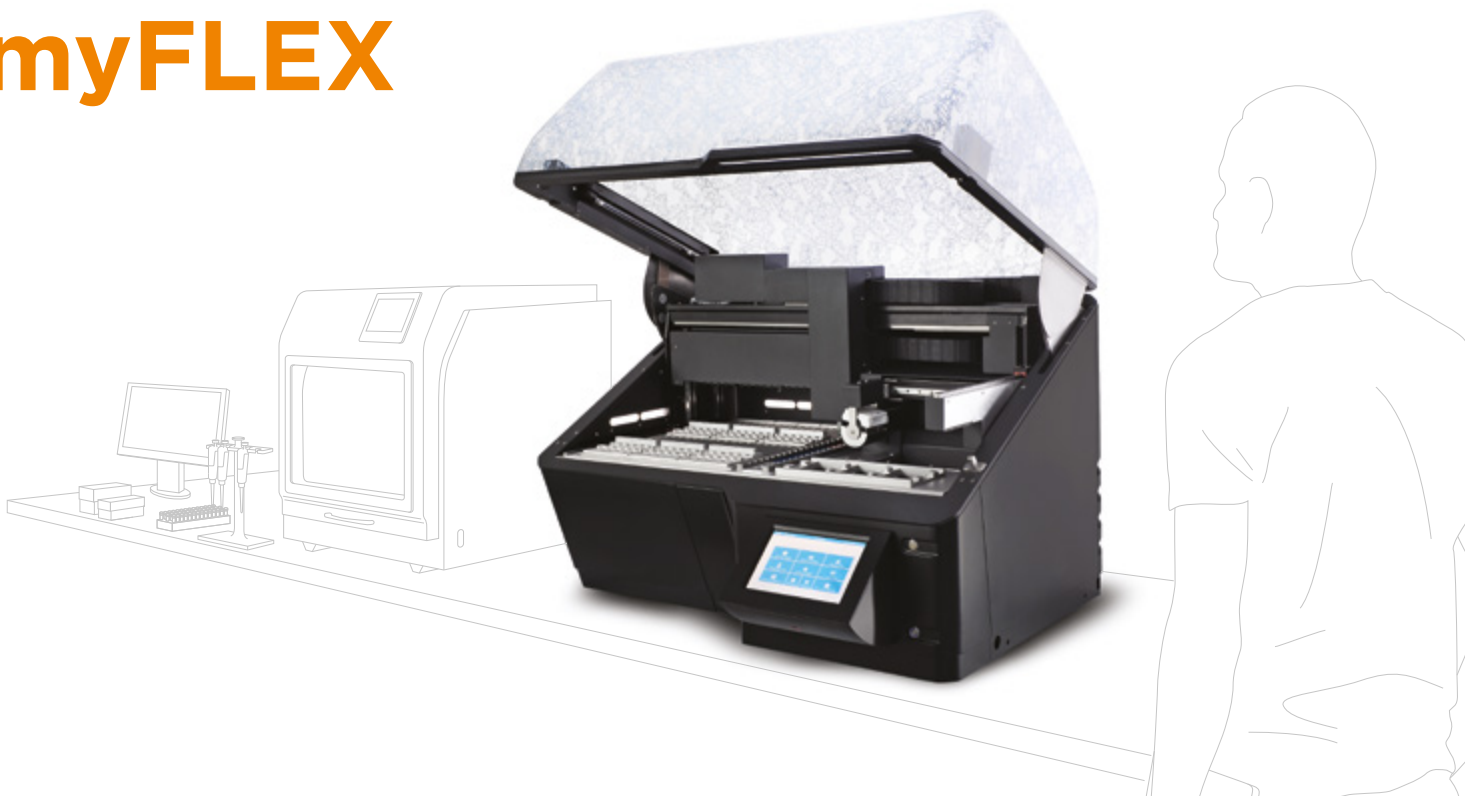

**Fully automated sample-to-result solution
for molecular diagnostics with a broad
spectrum of diagnostic tests**

The whole process from NA extraction,
PCR setup (including automatic PCR plate sealing),
PCR amplification to automatic result evaluation in one place

FLEXIBILITY

myFLEX

FLEXIBILITY

Up to 10
tests per
sample

- Multiple specimen types and tests in a single run
- Any combination of tests from one sample

LABORATORY ON THE TABLE

Compact solution

UNIQUE ANSWER FOR ALL LABORATORY TYPES

100% TRACEABILITY AND LIMS/LIS CONNECTIVITY

- Unique barcode system
- Traceability of the whole diagnostic process

CE **IVD**

- CE IVD instrument - Regulation (EU) 2017/746 (IVDR)
- Broad spectrum of CE IVD tests

myFLEX

- Multiple specimen types and tests in a single run

 • Swab, plasma, serum, whole blood, urine, CSF and others

- Any combination of tests from one sample
- Capacity
 - 1-36 samples / run
 - Up to 90 tests / run
 - Up to 108 samples and 270 tests / day

Simplify Complexity

Clinical use - example

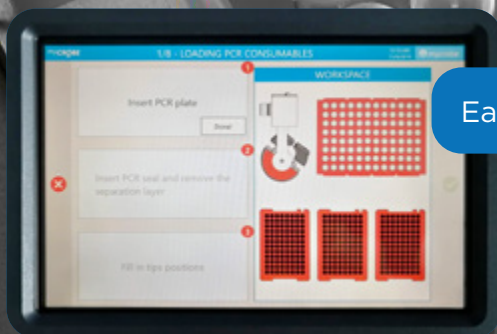

Fully automated sample-to-result solution includes:

- **myCROBE® Fully Automated Instrument**
- **Nucleic Acid Extraction**
- **Broad spectrum of PCR tests**
- **Consumables**

USER FRIENDLY AND INTUITIVE

Easy-to-use concept

Unique
& patented
solutions

Automatic corrections
of human errors
